ScrapGen Sprint-0 Retrospective

Date Initiated	23 October, 2018
Date Ended	06 September
Based on	UI

Insights

Number of Days	15
Estimated Hours	22 + 5
Actual Hours	14 + 3.5
Number of Commits	35

Retrospective

What did I do well?	What should have I done better?
- Proceeded as planned - Committed on GitHub everyday - Everyday To-Do, Progress & Done lists were created & emptied. - Analyzed & Decided for the best tool (ElectronJS) - Learned the tool within a night & implemented. - The Final UI matches the Designed UI. - Elements are minimal & complete. - Completed the UI Design & Development phase before September 2nd's Milestone.	- Invested more time in developing conventionally. - The UI was basic & should've taken lesser time. - Implemented UI Testing. - Completed Jest course & test the script. - Manage the files with separate folders. - Invested more time learning about Electron & Desktop Apps. - Analyzed previous day's work. - Referred the roadmap at times.
